## Introduction:

Water conservation and management policy of Sagar Institute of Research and technology encompasses the policies, strategies and activities designed to manage water sustainably to meet current and future demands in the campus and society. Sagar Institute of Research and Technology (SIRT) strongly believe in the motto of "Save blue to save green". The institute's water conservation and management policy include all of the measures taken to manage water sustainably in order to meet both present and future demand on the campus. The institute recognize the moral duty and social responsibility of each individual and community as a whole to contribute in the conservation of water and rejuvenation of water resources.

## Objective:

The objective of this policy is as follows:

- To maximize the efficient use of water and prevent water wastage.
- Spread awareness about Water Conservation education to all the stakeholders.
- Research and implementation of practices that promote efficient use of water.
- Coordination between water planning and other aspect of facility planning and management in association with local government body.

## Water Conservation committee

### Constitution:

1. Head of the committee will be a Professor nominated by Director of the Institute.
2. Administrative officer with his team
3. Members of the committee will be 3 senior faculty members nominated by Director of the Institute.

### Frequency of meeting:

- Twice in a year or as and when required.

## Major Initiatives:

- Reduce the wastage of water by fitting proper valves and arrest the leakages.
- To use more efficient water infrastructure and sanitary fittings
- To monitor and maintain the rainwater harvesting system implemented in the institute regularly.
- To ensure regular maintenance of Sewage treatment plant (STP) in the campus and using this processed water for watering gardens and grounds.
- Boards displaying the motto "Save water" to be provided at different places to make aware of students and staff.
- World water day and world environment day to be celebrated to imbibe the Importance of water conservation.
- Provide awareness and training on the water conservation measures adopted by the college to all the students, staffs and other stakeholders of college and nearby community.
- Organize various outreach programs under the leadership of NSS, Sage True Foundation and other student bodies.
- Develop research processes that are efficient and use resources wisely.
